DETAILED ACTION

1. This application has been examined. Original claims 1-8 are pending. The rejections are as stated below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 4, 7 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Walker et al. US Pat. No. 5,798,508 A.

Claims 1, 4, 7 and 8, walker teaches a system configured to facilitate the transmission of messages from a seller to a supplier comprising: a seller application; a supplier application; a web application coupled to the supplier application; and a proxy application coupled between the seller application and the supplier application, wherein the proxy application is configured to encrypt/decrypt and transmit data from the seller application to the supplier application, wherein the supplier application is configured to

facilitate exchanging information with one of the seller application and the supplier application, and wherein the system facilitates transmitting information related to the sale of travelers checks, and prepaid services (figs. 1A, 2A, 6-10, and column 2, line 56 thru column 5, line 17 and column 8, line 7 thru column 11, line 25).

Claim Rejections – 35 U.S.C. 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or unobviousness.

6. Claims 2, 3, 5 and 6 are rejected under 35 U.S.C. 103(a) as being obvious over Walker et al. US Pat. No. 5,798,508 A.

Claims 2, 3, 5 and 6, walker fails to teach that the seller application is a web services application, using SOAP and HTTP between the seller application and the

supplier application, and using a SOAP message conforming to the WSDL.

It is old and well known in the art to use web applications and using SOAP messages conforming to WSDL. It would have been obvious to one of ordinary skilled in the art at the time the applicant's invention was made to modify the teachings of Walker to include that the seller application is a web services application, using SOAP and HTTP between the seller application and the supplier application, and using a SOAP message conforming to the WSDL, one of ordinary skilled in the art would be motivated to do so, because it provides convenience to the user, and it greatly improves the efficiency of the system by formatting the message so that the sender can construct it and the receiver can process it.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hani Kazimi whose telephone number is (571) 272-6745. The examiner can normally be reached Monday-Friday from 8:30 AM to 5:00 PM.
